

Key Programming Software Update Compatible with Renault* ADS2325 - Code D755975AD

November 2024

'Plug and Play' key programming for an extended range of popular recent Renault, Dacia and Nissan models.

What does the software do?

Using Smart Pro and the unique Advanced Diagnostics' 'plug and play' emulator and bypass cables, both proximity and bladed keys can be programmed easily and safely for a range of Renault, Dacia and Nissan models even in an all keys lost situation. The software bypasses the security pincode and programmes the remote and transponder at the same time.

The procedure is risk-free, unlike other solutions the ADC2017 cable plugs directly into the BCM (Body Control Module) without need of further intervention on the vehicle.

What else is needed?

Cable and key use depends on specific model

Smart Pro

ADC2017

Emulator cable
ADC2020

VA2R01
RN-N01R11

RN-CP06

VA150S13
VA150S15

OFFER DETAILS

Cable	ADC2000 - ADC2017
Smart Aerial/Smart Aerial+ required	Certain models only
Software category	A
Other accessories required	ADC2020 (certain applications only)
