

New Key Programming Software Honda* 2024 ADS2336 - Code D757551AD

December 2024

Five-minute key programming for a range of popular, recent Honda models.

What does the software do?

Using Smart Pro, new proximity keys can be programmed easily and safely for a range of Honda models without need of a working key. Keys can be added or erased whilst the software bypasses the security pincode to programme the remote and transponder at the same time. The entire procedure takes less than 5 minutes even in an all keys lost scenario.

Server Connection required. The ADS2336 software requires an internet connection to access the programming calculation in the proprietary Advanced Diagnostic server.

What else is needed?

Smart Pro

OFFER DETAILS

Cable	ADC2000B
Smart Aerial required	No
Software category	A
Other software needed	No

Applications

 *	KEY TYPE
